DIFFERENTIAL EQUATIONS

Volume 29, Numbers 1–12, 1993

(A translation of *Differentsial'nye Uravneniya*)

Engl./Russ.

Volume 29, January, 1993

ORDINARY DIFFERENTIAL EQUATIONS

On Regularized Traces of Even-Order Differential Equations with Unbounded Operatcr Coefficients – M. S. Almamedov, M. Bairamogly, and V. I. Katanova 1 5

Conditions for a System of Exponents with Shift to Be a Basis – B. T. Bilalov 10 15

Necessary Condition for a System of Root Functions of an Ordinary Non-self-Adjoint Differential Operator to Be a Riesz Basis – V. D. Budaev 14 20

Some Properties of the Root Vector-Functions of Higher-Order Operators – V. D. Budaev 23 30

A Revision of the Tamarkin Asymptotic Theorem – A. I. Vagabov 33 41

Regularized Traces of Higher-Order Elliptical Operators – V. V. Dubrovskii and A. S. Pechentsov 42 50

On a Certain Boundary Value Problem – N. B. Kerimov and T. I. Allakhverdiev 45 54

Higher-Order Regularized Traces of a Harmonic Oscillator – G. V. Kozlov and V. A. Lyubishkin 51 61

Representations and Estimates of the Root Functions of Singular Differential Operators on an Interval. 2 – L. V. Kritskov 54 64

On the Basis of Systems of Irregular Root Vectors of High-Order Differential Operators – I. S. Lomov 62 74

Necessary Conditions for a Hilbert Inequality to Be Valid for an Arbitrary Radial Function on the System of Eigenfunctions of the Laplace Operator – A. A. Malov 73 87

A Contribution to the Eigenvalue Problem for Equations of Mixed Type – Ya. N. Mamedov 80 95

Solvability of a Boundary Value Problem by the Eigenvalue Method – E. I. Moiseev 88 104

On the Summation Basis of Series of Root Vectors of a Non-self-Adjoint Sturm-Liouville Operator Using Abel's Method – M. A. Mustafin 98 116

Estimate of the Difference Between the Partial Sums of Two Spectral Expansions of an Absolutely Continuous Function Which Correspond to Two One-Dimensional Schrödinger Operators with Complex Potentials from L_p When $p > 1$ – E. I. Nikol'skaya 100 118

	Engl.	Russ.
On Recovering the Potential in the Schrödinger Operator on a Line Using Born's Approximation – V. S. Serov and D. S. Tkachenko	108	128
The Distribution of the Sturm-Liouville Operator's Eigenvalues in the Dirichlet Problem for a Truncated Wedge – A. F. Ulitko, A. G. Kisilevskii, and L. Shorfi	117	139
A Hilbert Inequality over the System of Eigen and Associated Functions of an Even-Order Differential Operator – G. E. Shikina	122	145
Dirac-Type System with Variable Coefficients – V. Ya. Yakubov	132	156
Existence Theorem for the Solution of a Quasilinear Boundary Value Problem on a Semi-Infinite Interval – V. V. Gudkov	139	165
Approximation of the Solution of an Initial Value Problem – A. E. Zernov	142	168
On the Complete Global Controllability of Linear Systems with Aftereffects under Restrictions on Control – S. A. Minyuk	144	170
On Solving Boundary Value Problem for Filtration Equation with Arbitrary Integrable Coefficient $P(y)$ – S. E. Kholodovskii	146	172
On the Dissipativity of Random Processes Determined by Some Nonlinear Second-Order Differential Equations – M. M. Shumafov	149	175

Volume 29, February, 1993

ORDINARY DIFFERENTIAL EQUATIONS

	Engl.	Russ.
Stability of Linear Systems with Aftereffect. IV – N. V. Azbelev, L. M. Berezanskii, P. M. Simonov, and A. V. Chistyakov	153	196
Some Properties of Solutions of Differential Equations with Constant Coefficients – Yu. F. Korobeinik	161	205
Parametric Criteria for Functional Observability and Functional Attainability of Differential-Difference Systems – A. V. Metel'skii	173	219
On the Limiting Cycles of a Cubic System Describing Nonlinear Oscillations – A. P. Sadovskii	180	226
Distribution of Zeros of Solutions to a Nonlinear System – Ch. A. Skhalyakho	186	232
On the Number of Second-Group Singular Points of Cubic System – D. S. Ushkho	194	240
Investigation of the Systems with Uniform Cubic Nonlinearities and with Focus and Center – N. L. Shcheglova	198	246
Asymptotics for the General Solution of Linear Singularly Perturbed System with Two Small Parameters – V. P. Yakovets	208	256

PARTIAL DIFFERENTIAL EQUATIONS

	Engl.	Russ.
The Dirichlet Problem for Quasilinear Degenerating Elliptical Equations in Unlimited Regions – A. L. Gladkov	217	267
A Nonlocal Boundary Value Problem from the Two-Dimensional Stationary Theory of Elasticity – N. A. Zhura	224	274
On Periodic Boundary Value Problems for Linear Hyperbolic Equations. I – T. I. Kiguradze	231	281
On Solutions of Weakly Nonlinear Elliptic Equations in the Neighborhood of a Conic Point at the Boundary – V. A. Kondrat'ev	246	298

	Engl.	Russ.
Asymptotic Solution for the Korteweg–de Vries Equation with Weak Dissipation as Time Tends to Infinity – P. I. Naumkin and I. A. Shishmarev	253	306
On a General Approach to the Solution of Classical Boundary Value Problems for Polyanalytical Functions and Their Generalizations – K. M. Rasulov	264	320
On the System of Magnetohydrodynamic Boundary Layer Equations for a Dilatational Medium – V. I. Samokhin	270	328
The Cauchy Problem for the Equations of Magneto-Gas Dynamics – Sh. S. Smagulov, A. A. Durmagambetov, and D. A. Iskenderova	278	337
"Dead Zone" Theorem for a Weakly Degenerate Quasilinear Elliptic Equation – M. V. Tuvaev	289	349
BRIEF COMMUNICATIONS		
To a Theory of the Chasy Equation – N. A. Lukashevich	293	353
Contribution to the Theory of Optimum Control and Filtration for Linear Stochastic Discrete Systems – S. A. Minyuk and A. P. Tynkovich	298	358
Controllability of Two- and Three-Dimensional Bilinear Systems in the Positive Orthant – Yu. L. Sachkov	301	361
Vasilii Sergeevich Vladimirov (A tribute in honor of his 70th birthday)	305	187

Volume 29, March, 1993

On an Analytic Nonlinear Periodic Problem – Yu. A. Dubinskii	315	371
Nonlinear Phenomena in Nonstationary Processes Described by Asymptotically Linear Equations – A. S. Kalashnikov	324	381
About Equations with Noncompact Indefinite Operators – I. A. Kuzin	335	392
On the Behavior of Solutions to a Mixed Initial-Boundary Value Problem for Non-Newtonian Polytropic Filtration – V. V. Kurta	345	402
On Dead Zones for Semilinear Degenerate Elliptic Inequalities – E. M. Landis	355	414
Solvability Conditions for the Dirichlet Problem for the Parabolic Equation $F(t, x, u, u_x, \Delta u, u_t) = 0$ – G. I. Laptev	364	424
Resonance Ill-Posed Problems and Their Regularization – V. P. Maslov	373	435
Rotational Ill-Posedness of the Ideal Gas Equations and Its Regularization – V. P. Maslov	384	448
The Stefan Problem with Surface Tension as the Limit of a Phase Field Model – P. I. Plotnikov and V. N. Starovoitov	395	461
Exact *A Priori* Estimates for Certain Quasilinear Elliptic Equations – S. I. Pokhozhaev	405	472
On the Asymptotic Solutions of a Phase Field System – E. V. Radkevich	418	487
On Quasilinear Parabolic Higher-Order Equations with Hölder Solutions – I. V. Skrypnik	430	501
Fatou's Theorem for Solutions of Quasilinear Parabolic Equations of Second Order – I. I. Skrypnik	441	515
Global Solutions to Nonlinear Schrödinger Equations with Variable Coefficients in the Exterior Domains in $\mathbf{R}^3$ – Masaioshi Tsutsumi	449	523
Dynamics of Support Geometry for Generalized Solutions to a Quasilinear Divergent Parabolic Equation of Higher Order – A. E. Shishkov	460	537

Engl./Russ.

Volume 29, April, 1993

ORDINARY DIFFERENTIAL EQUATIONS

A Constructive Method for Solving the Controlability Problem for Ordinary Differential Equations – S. A. Aisagaliev and S. S. Aisagalieva 471 555

On a Class of Operators in the Space of Continuous Functions over a Localy Compact Commutative Group – I. V. Gaishun 483 568

Coordinate-Wise Estimates of the Attainability Set of a Dynamic System – V. V. Zaitsev 489 575

Algorithm to Obtain an Asymptotic Solution for Time-Optimum Control of a Singularly Perturbed Nonlinear System – A. I. Kalinin 497 585

Generalized Eigenvalue Problems, Problems of Steady-State Regimes, and Regimes with Peaking of Strongly Nonlinear Unsteady Processes – V. R. Kardashov 507 597

Adaptive Integro-Differential Algorithms for the Stochastic Optimization of Dynamic Systems – V. Yu. Tertychnyi 518 610

PARTIAL DIFFERENTIAL EQUATIONS

Inhomogeneous Problems for Odd-Order Loaded Evolution Equations with Interior Boundary Conditions – M. T. Dzhenaliev 524 617

Asymptotic Behavior of Solutions to Nonlinear Elliptic Systems at Infinity – E. A. Kalita 533 627

Periodic Boundary Value Problems for Hyperbolic Equations. II – T. I. Kiguradze 542 637

Existence and Nonexistence of Global Solutions to Some Nonlinear Elliptic-Parabolic Equations – K. N. Soltanov 550 646

The Square Root of a Self-Conjugate Operator and the Cauchy Problem for Elliptic Equations – R. P. Tarasov 564 662

NUMERICAL METHODS

On One Class of Difference Schemes for the Navier-Stokes Equation. II – V. N. Abrashin and S. L. Lapko 574 673

Adaptive Methods for the Numerical Solution of Stiff Systems – V. V. Bobkov, P. A. Mandrik, and V. I. Repnikov 586 689

Conservative Finite-Difference Scheme in Subdomains for Parabolic and Hyperbolic Second-Order Equations – P. P. Matus 595 700

BRIEF COMMUNICATIONS

Higher Order Matrix Linear Differential Equations – V. P. Derevenskii 605 711

Algebraic Approach to the Study of Stability of Cauchy Problem for Fedorov Systems of Partial Differential Equations – S. V. Zhestkov and E. A. Ermolaev . . . 610 715

Theorems on Motion Stability and Examples – Yu. V. Malyshev 612 717

The Differentiability with Respect to the Initial Conditions of a Solution to a Differential Inclusion with Delay – L. I. Minchenko and V. N. Teslyuk 614 719

Controllability of Nonlinear Systems with Constraints – V. N. Rozova 616 721

Criterion for Risky and Safe Bounds for Discrete Systems – L. Z. Fishman 619 723

Periodic Solutions of Differential Inclusions with Monotonous Operators – V. L. Khatskevich 621 725

On Kukles and Cherkas Conditions for a Center of a Cubic System – A. S. Shubé 625 728

Engl./Russ.

Volume 29, May, 1993

ORDINARY DIFFERENTIAL EQUATIONS

Strong Isochronism of Center for Dynamical Systems with Second-Order Polynomials on the Right-Hand Side – V. V. Amel'kin and Chin' Zan' Dang 629 739

Solvability of Problems with Monotone Boundary Conditions – S. A. Brykalov 633 744

Asymptotic Behavior of the Solution to a Steady-State Delay System – B. G. Grebenshchikov and V. I. Rozhkov 640 751

Kinematics of a Rigid Surface Rolling on Two Guides – M. Z. Ensebaeva and A. D. Myshkis 648 759

An Existence Criterion and Estimates for Invariant Bounded Sets of a System of Autonomous Differential Equations – V. V. Zaitsev 654 766

Distribution of Eigenvalues for Singular Differential Operators on an Interval – L. V. Kritskov 660 773

An Analog of the Hopf Bifurcation Theorem in Mathematical Investigation of Nonlinear Panel Flutter with Small Damping Factor – A. N. Kulikov 666 780

Specific Smoothness of Solutions to Problems with Singular Perturbation – S. A. Lomov 672 786

To the Investigation of Stability for Evolution Equations Using Lyapunov's Functionals – Yu. N. Merenkov 680 795

Almost Periodic Sampled-Data Systems – A. M. Samoilenko and S. I. Trofimchuk 684 799

PARTIAL DIFFERENTIAL EQUATIONS

An Analog of the Darboux Problem for the Two-Dimensional Wave Equation. II – A. B. Bazarbekov 692 809

Complex First-Order Elliptic Systems – V. E. Balabaev 699 818

Singularly Perturbed Systems of Reaction-Diffusion-Transport Type – V. F. Butuzov . . 713 833

Two Models Based on the Yang-Mills Equations – A. A. Dezin 724 846

Asymptotics of the Spectral Function for Selfadjoint Pseudodifferential Operators – V. V. Dubrovskii and A. S. Pechentsov 729 852

Asymptotic Problems Related to Nondivergent Parabolic Second-Order Equation with Stochastically Uniform Coefficients – V. V. Zhikov 735 859

A Criterion for Strong Solvability of the Tricomi Problem for the Lavrent'ev-Bitsadze Equation. General Case – T. Sh. Kal'menov, M. A. Sadybekov, and N. E. Erzhanov 745 870

Unique Solvability of the Frankl' Problem and Other Topics in the Theory of Generalized Analytic Functions – N. Yu. Kapustin 751 876

Solvability of Mixed-Contact Problems in the Plane Theory of Elasticity – S. P. Mitin and A. P. Soldatov 760 885

On the Regular Solvability of a Nonclassical Boundary Value Problem – E. I. Moiseev 764 890

BRIEF COMMUNICATIONS

On a Nonlocal Boundary Value Problem for Elliptic-Hyperbolic Equations – G. D. Karatoprakliev 774 902

On Tikhonov's Problem in a Semibounded Domain – D. V. Sivakov 777 905

	Engl.	Russ.
On the Smoothness of the Parabolic Simple Layer Potential – E. K. Utkin	780	908
Calculation of Lyapunov Numbers in the Case of Two Pure Imaginary Roots – V. G. Romanovskii	782	910
The Existence Conditions for the Last Jacobi Multiplier of a Special Form – A. M. Terent'ev	785	913

Volume 29, June, 1993

ORDINARY DIFFERENTIAL EQUATIONS

Local Structure and Smoothness Preventing Quasiminimality for Flows on the Torus – S. Kh. Aranson, E. V. Zhuzhoma, and M. I. Malkin	789	923
Continuability of Trajectories of Control Systems and Boundedness of Integral Funnel – N. L. Belaya and N. N. Petrov	792	927
On Mobile Singularities of a Nonlinear Differential Equation – B. P. Bogoslovskii and V. A. Kazakov	798	933
Solutions with Prescribed Maximum and Minimum – S. A. Brykalov	802	938
Two Optimization Problems for Nonlinear Periodic Control Systems with Aftereffect – P. Zecca, P. Nistri, and A. V. Frolov	806	943
On a Boundary Value Problem. II – N. B. Kerimov and T. I. Allakhverdiev	814	952
An Output Controllability Criterion for Linear Autonomous Functional-Differential Equations – A. V. Metel'skii	822	961
On the Dependence of a Solution to a Linear System of Differential Equations on a Parameter – Nguen Tkhe Khoan	830	970
On the Conditions for Existence of Algebraic Solutions to a First-Order Nonlinear Differential Equation – V. G. Tsirulik	836	976
Different Growth Orders for Normalized Eigenfunctions of a Sturm-Liouville Problem with Continuous Weight – V. Ya. Yakubov	841	982

PARTIAL DIFFERENTIAL EQUATIONS

Analysis of the Phase Portrait of the Generalized Kuramoto-Sivashinskii Equation – A. M. Arkhipov	849	990
On Quasilinear Degenerating Parabolic Equations with Singular Lower-Order Terms and Growing Initial Values – A. S. Kalashnikov	857	999
The Asymptotics of a Double Fourier-Type Integral Occurring in the Theory of Soliton Perturbations – L. A. Kalyakin	867	1010
On Isolated Singularities of Solutions to Equations of Emden-Fowler Type – V. A. Kondrat'ev and V. A. Nikishkin	881	1025
Continuity at the Boundary of Solutions to the Dirichlet Problem for Navier-Stokes Equations in a Nonsmooth Domain – S. P. Levashkin	894	1039
On a Discrete Time Analog of the General Boundary Value Problem for Partial Differential Equations in a Half-Space – N. B. Mikushin	903	1048

BRIEF COMMUNICATIONS

Strong Isochronism of Center in Dynamical Systems with Noncomplete Third-Order Polynomials – V. V. Amel'kin and Chin' Zan' Dang	912	1057
Frequency Criterion for Orbital Stability of Limit Cycles of Second Kind – I. M. Burkin	916	1061

	Engl.	Russ.
Entire Transcendent Solutions to Algebraic Differential Systems – V. N. Gorbuzov and Yu. Yu. Gnezdovskii	919	1064
On Bäcklund Transformations of Nonlinear Equations – V. I. Gromak	922	1067
Classes of Systems of Three Differential Equations Without Solutions with Undetermined Components – S. G. Kondratenya and I. N. Mel'nikova	924	1069
On the Asymptotics as $t \to \infty$ of Solutions to Nonlinear Equations for the Case of Maximal Order – P. I. Naumkin	926	1071
On the Classical Solution of Mixed Problem for One-Dimensional Hyperbolic Equation of Even Order – N. I. Yurchuk and Charie Koku	930	1075
Some Properties of the Spaces $W^{(B_1,\ldots,B_k)}(\Omega)$ with Integro-Differential Characterization – A. V. Kagal and V. M. Filippov	934	1078
Finitely Additive Measures in the Speed Problem – A. B. Pashaev	938	1082
CHRONICLE		
Seminar on the Qualitative Theory of Differential Equations in Moscow University	941	1085

Volume 29, July, 1993

	Engl.	Russ.
NUMERICAL METHODS		
Economical Iterative Methods for Solving Multidimensional Problems of Mathematical Physics. I – V. N. Abrashin	959	1107
Difference Schemes of the Multicomponent Method of Variable Directions for Elliptic Equations in Complex-Shaped Domains – T. G. Aleinikova and I. A. Dzyuba	968	1117
New Iterative Methods for Solving Multidimensional Elliptic Equations – T. G. Aleinikova and R. Yu. Chegis	974	1124
Numerical Solution to the Single-Phase Stefan Problem on an Adaptive Mesh with Variable Structure – N. V. Ardelyan and M. N. Sablin	980	1130
On the Accuracy of Linear Triangle Elements in Problems of Elasticity Theory with Crack Singularities – I. G. Belukhina	986	1137
Collocation Method for Linear Singularly Perturbed Boundary Value Problems on Nonuniform Meshes – E. N. Bobonova and V. V. Strygin	992	1144
Conservative Difference Schemes with Improved Dispersion Properties for Nonlinear Equations of Schrödinger Type – V. M. Volkov	1004	1156
On the Stability of a Class of Difference Schemes – A. V. Gulin and A. A. Samarskii	1010	1163
Method for Regularization of Multicomponent Difference Schemes – K. Dagkher and I. A. Dzyuba	1019	1174
The Adaptive Grid Method in One-Dimensional Nonstationary Convection-Diffusion Problems – L. M. Degtyarev and T. S. Ivanova	1023	1179
Efficient Difference Schemes for Nonlinear Evolution Equations – A. A. Egorov	1035	1193
Time-Grid Adaptation for Difference Schemes Solving Equations of Mathematical Physics – S. L. Lapko	1041	1200
Accuracy Estimates for the Schemes of Finite-Element Method for Second-Order Degenerate Elliptic Equations – A. D. Lyashko and M. R. Timerbaev	1049	1210
Spectral Properties of the Difference Laplacian on a Hexagonal Mesh and Their Applications – V. L. Makarov, S. V. Makarov, and M. N. Moskal'kov	1054	1216

	Engl.	Russ.
Conservative Difference Schemes for Quasilinear Parabolic Equations in Subdomains – P. P. Matus	1060	1222
Calculation of the Matrices of Difference Schemes for One-Dimensional Integral Equations of the Potential Theory – Yu. I. Mokin	1069	1232
Regularized Three-Layer Difference Schemes with Nonselfadjoint Operators – A. A. Samarskii and P. N. Vabishchevich	1081	1244
Projection-Grid Approximations in Variational Pyroelectricity Problems. I. Statement of Problems and Analysis of Stationary Forced Oscillations – G. A. Shinkarenko	1089	1252
INTEGERAL AND INTEGRO-DIFFERENTIAL EQUATIONS		
On the Kontorovich-Lebedev Integral Representation – A. M. Gomilko	1096	1261
Integral Equations and Convolutions Related to Transformations of Kontorovich-Lebedev Type – S. B. Yakubovich and A. I. Moshinskii	1107	1272
Volume 29, August, 1993		
Aleksei Alekseevich Dezin (A tribute in honor of his 70th birthday)	1119	1291
Ivan Aleksandrovich Kipriyanov (A tribute in honor of his 70th birthday)	1122	1295
ORDINARY DIFFERENTIAL EQUATIONS		
Stability of Nonlinear Systems with a Small Parameter – O. V. Anashkin and M. M. Khapaev	1127	1301
Stability of Solutions for a Class of Systems of Ordinary Differential Equations – A. R. Gaiduk	1133	1308
Backward Extension of Solutions to a Linear Delay Differential Equation as an Ill-Posed Problem – Yu. F. Dolgii and E. N. Putilova	1141	1317
Stability of Asymptotic Properties of Solutions to a Delay Differential Equation – V. V. Malygina	1147	1324
Some Global Results for Nonlinear Fourth-Order Sturm-Liouville Spectral Problems – A. P. Makhmudov and Z. S. Aliev	1152	1330
Steady Modes in an Autonomous System with Break and Delay – L. M. Fridman, É. M. Fridman, and E. I. Shustin	1161	1340
PARTIAL DIFFERENTIAL EQUATIONS		
On the Diffraction of a Plane Acoustic Wave by a Triaxial Ellipsoid – A. A. Abramov, N. B. Konyukhova, and T. V. Levitina	1167	1347
Boundary Value Problems for Canonical Systems of First Order – V. E. Balabaev	1177	1358
The Solution of the Biharmonic Equation in the Complex Space C^2 – F. A. Bogashov	1188	1370
Boundary Value Problems for Differential-Operator Equations of Odd Order and Loaded Equations – M. T. Dzhenaliev	1196	1380
Asymptotics of Solutions to a System of Singularly Perturbed Equations 'Reaction-Diffusion-Transfer' – S. T. Esimova	1205	1390
On the Asymptotic Behavior of Periodic Solutions for a Class of Operator Differential Equations – M. Yu. Kokurin	1214	1400
On the Tricomi Problem with Generalized Sewing Conditions for a System of Mixed Type – M. M. Ovezova	1221	1408

	Engl.	Russ.
A Well-Posed Statement of a Mixed Problem with Oblique Derivative for the Wave Operator – S. E. Pastukhova	1227	1415
A Criterion of the Existence of Generalized Integral Variational Principles for Given Equations – V. M. Savchin	1235	1425
A Discrete Analog of the Cauchy Integral – V. N. Sushch	1242	1433
Sard's Theorem Applied to Prove Unique Solvability of a Boundary Value Problem for a Semilinear Parabolic Equation with Nonlocal Source – A. V. Shchepetilov	1250	1442
BRIEF COMMUNICATIONS		
An *a Priori* Estimate for the Quasiinversion Method – É. M. Aksen' and N. I. Yurchuk	1254	1447
Incompleteness of the Set of Root Functions in the Tricomi Problem for the Lavrent'ev-Bitsadze Equation – E. V. Antipova	1257	1451
Stability of Solutions to Differential and Difference Equations with Nondifferentiable Right-Hand Sides – I. V. Boikov	1259	1453
Orbital Stability of Second-Kind Limiting Cycles for Dynamical Systems with Cylindrical Phase Space – I. M. Burkin	1262	1456
Main Boundary Value Problems for a Third-Order Equation in a Three-Dimensional Domain – V. F. Volkodavov and I. N. Rodionova	1265	1459
The Radiation Conditions for the Helmholtz Equation in a Multidimensional Layer with Impedance Boundary Conditions – B. A. Iskenderov and A. I. Mekhtieva	1268	1462
Functional Description of Uniform Exponents of Linear Diagonal Differential Systems – A. V. Konyukh	1272	1465

Volume 29, September, 1993

ORDINARY DIFFERENTIAL EQUATIONS		
The Limit Behavior of O-Curves of a Quasihomogeneous System in $\mathbf{R}^3$ – A. F. Andreev	1277	1475
On Limit Cycles of a Class of Systems – M. V. Dolov and R. V. Kuz'min	1282	1481
Polynomial Stabilization and Its Applications to Ordinary Differential Equations – L. D. Kudryavtsev	1286	1486
INTEGRAL AND INTEGRO-DIFFERENTIAL EQUATIONS		
Multidimensional Singular Integral Equations with Positive Operators – B. G. Gabdulkhaev	1302	1504
Solving Space Problems of Acoustics and Elasticity by the Potential Method – N. E. Ershov and S. I. Smagin	1314	1517
Singular Solutions of Singular Integral Equations for Some Problems in Electrodynamics – E. V. Zakharov, I. I. Lifanov, and I. K. Lifanov	1323	1526
Two Boundary Value Problems for Two Bodies in Non-Abelian Gauge Field – A. F. Matveev and S. V. Molodtsov	1329	1533
Approximate Solutions to Some Mixed Boundary Value Problems for Infinite Systems of Difference-Differential Equations – N. Ya. Tikhonenko and A. M. Chadaev	1338	1542
On Approximate Solution of Prandtl's Integro-Differential Equation – M. A. Sheshko, G. A. Rasol'ko, and V. S. Mastyanitsa	1345	1550

Engl./Russ.

NUMERICAL METHODS

On a Class of Iterative Methods for the Stationary Navier-Stokes Equations. I – V. N. Abrashin and S. L. Lapko 1355 1561

Effective Numerical Schemes of Conjugate Gradient Method and Their Investigation for the Problem of Modeling Semiconductor Structures – S. S. Belyavskii, S. G. Mulyarchik, and A. V. Popov . . 1367 1575

Calculation of Singular Integrals by Adaptive Algorithms – I. V. Boikov 1376 1585

On the Stability of the Spline-Qualocation Method for Singular Integral Equations with Conjugation – V. D. Didenko and G. L. Pel'ts 1383 1593

Quasisolution of Boundary Value Diffraction Problems on the Basis of Hypersingular Equations – Yu. A. Eremin and A. G. Sveshnikov . . 1392 1602

A Method of Approximate Path Integration in the Solution of Partial Differential Equations – E. P. Zhidkov and Yu. Yu. Lobanov 1399 1609

Finite Groups in Numerical Analysis of Boundary Integral Equations – E. V. Zakharov, S. I. Safronov, and R. P. Tarasov 1409 1620

Numerical Solution of Boundary Value Problems by Approximation of Singular Integrals – D. G. Sanikidze 1419 1632

Singular Integrals on Compact Manifolds with Singularities – V. B. Vasil'ev 1427 1642

Approximate Solutions to Singular Integral Equations with Shift in the Spaces L_p – V. A. Zolotarevskii and I. A. Élavadi 1429 1644

About Galerkin Method for Solving Boundary Equations for Nonstationary Diffraction of Elastic Waves on Spatial Fractures – I. Yu. Chudinovich 1433 1648

Volume 29, October, 1993

ORDINARY DIFFERENTIAL EQUATIONS

On the Aizerman Problem for Third-Order Nonstationary Systems – N. E. Barabanov 1439 1659

The Topological Classification of Quadratic Systems with Fourfold Singular Point – N. I. Vulpe and I. V. Nikolaev 1449 1669

Rational Solutions to Algebraic Differential Equations – V. N. Gorbuzov and V. S. Nemets 1454 1675

A Criterion for the Matrix Differential Riccati Equation to Be Linearizable and Some Properties of Solutions – M. A. Egorov 1461 1684

Linear Systems of Class L^pS with Integrable Perturbations – R. Conti, N. A. Izobov, and R. A. Prokhorova 1466 1689

Regular on R Linear Systems of Differential Equations – V. L. Kulik 1475 1699

Boundedness of Trajectories of Nonstationary Phase Systems – A. V. Savkin 1480 1705

PARTIAL DIFFERENTIAL EQUATIONS

Approximate Groups of Transformations – V. A. Baikov, R. K. Gazizov, and N. Kh. Ibragimov 1487 1712

Transformation Groups with Function Parameter – T. Zh. Esirkepov 1505 1733

Seven Miniatures on Group Analysis – N. Kh. Ibragimov 1511 1739

	Engl.	Russ.
The Group of Lie-Bäcklund Equations in Nonlinear Geometric Optics – V. F. Kovalev, V. V. Pustovalov, and S. I. Senashov	1521	1751
On the Structure of Variational Equations with the Symmetric Operator d/dt – V. M. Savchin	1532	1765
Group Classification of Nonlinear Polyharmonic Equations and Their Invariant Solutions – S. R. Svirshchevskii	1538	1772
Higher Integrals and Symmetries of Semi-Hamiltonian Systems – M. B. Sheftel'	1548	1782
INTEGRAL AND INTEGRO-DIFFERENTIAL EQUATIONS		
Weak Invariants of Local Transformation Groups – Yu. Yu. Berest	1561	1796
Group Analysis of Vlasov's Kinetic Equation. I – V. F. Kovalev, S. V. Krivenko, and V. V. Pustovalov	1568	1804
SHORT PRELIMINARIES		
On the Number of Negative Eigenvalues of the Schrödinger Operator – Sh. A. Alimov and S. A. Safaev	1579	1818
The Converse Mean Value Theorem for the ith-Order Adjoint Functions of the Laplace Operator – O. V. Kashtanov	1583	1822
Group Analysis of Equations of Heat Self-Influence for Laser Radiation in a Moving Medium – A. G. Kudryavtsev	1586	1825
The Fredholm Property of a Discrete Convolution-Type Equation with Almost Stabilizing Coefficients – A. I. Tuzik	1590	1829
The Tricomi Problem for the Lavrent'ev-Bitsadze System in a Special Domain – T. V. Chekmarev	1593	1832
Sergei Aleksandrovich Lomov (obituary)	1595	1834

Volume 29, November, 1993

Second-Order Proximal Differential Systems with Feedback Control – A. S. Antipin	1597	1843
A Generalized Isoperimetric Problem on a Polyhedron – A. P. Afanas'ev	1608	1856
Spectrum Control in a Two-Parameter Discrete System – I. V. Gaishun and Hoang Van Kuang	1618	1868
Higher-Order Sliding Modes in Control Systems – S. V. Emel'yanov, S. K. Korovin, and A. Levant	1627	1877
Auxiliary Mapping Method and Doubly Asymptotic Solutions to Differential Equations – L. V. Kogan, N. Ya. Kogan, and Yu. I. Neimark	1648	1900
On a Method to Construct Lyapunov Functionals for Stochastic Systems with Aftereffect – V. B. Kolmanovskii and L. E. Shaikhet	1657	1909
Approximation of the Output of a Singular Multidimensional Affine System – A. P. Krishchenko	1667	1921
Modal Control of a System with Distributed Delay under the Condition of Incomplete Information – V. M. Marchenko and I. M. Borkovskaya	1673	1928
A Crossing Problem with Possible Stop of Engine – M. S. Nikol'skii	1681	1937
The Poisson Theorem in Optimal Control Problems – A. V. Pukhlikov	1685	1941
Dynamical Search and Detection Problems on Some Closed Surfaces – A. G. Chkhartishvili and E. V. Shikin	1691	1948

	Engl./Russ.	
PARTIAL DIFFERENTIAL EQUATIONS		
Group Analysis of Linear Differential Equations in Distributions and the Construction of Fundamental Solutions – Yu. Yu. Berest	1700	1958
Group Analysis of the Vlasov Kinetic Equation. II – V. F. Kovalev, S. V. Krivenko, and V. V. Pustovalov	1712	1971
On Multiplicative Exponential Asymptotics of Solutions to Wave Equations – I. V. Kremleva, B. Yu. Sternin, and V. E. Shatalov	1722	1984
SHORT PRELIMINARIES		
On a Periodic Problem for the Nonlinear Nonlocal Schrödinger Equation – E. I. Kaikina and I. A. Shishmarev	1733	1996
The Method of Formal Derivatives for Solving the Cauchy Problem for a System of Partial Differential Equations – N. T. Stel'mashuk and V. A. Shilinets	1737	1999
The Solution of an Integral Equation Related to the Tricomi Problem – T. V. Chekmarev	1740	2002
Solving Elliptic Differential Equations by the Method of Transformation of Diffusion Processes – I. D. Cherkasov	1744	2006
CHRONICLE		
The Seminar on Qualitative Theory of Differential Equations at Moscow State University	1748	2010

Volume 29, December, 1993

Lev Dmitrievich Kudryavtsev (A tribute in honor of his 70th birthday)	1763	2027
Éduard Genrikhovich Poznyak (A tribute in honor of his 70th birthday)	1769	2032
REVIEWS		
Studies in Belorussia in the Theory of Characteristic Lyapunov Exponents and Its Applications – N. A. Izobov	1771	2034
ORDINARY DIFFERENTIAL EQUATIONS		
Stabilization Problems for Ordinary Differential Equations – L. D. Kudryavtsev	1789	2056
Small Denominators in Analytic Theory of Degenerate Differential Equations – I. S. Lomov	1811	2079
Linear Systems with L^p-Dichotomy – R. A. Prokhorova	1821	2090
PARTIAL DIFFERENTIAL EQUATIONS		
Multidimensional Darboux Problems for Degenerate Hyperbolic Equations – S. A. Aldashev	1829	2097
Asymptotic Behavior of Solutions to the Second Boundary Value Problem for Nonlinear Parabolic Equations – V. N. Aref'ev and V. A. Kondrat'ev	1835	2104
Nonlocal Boundary Value Problems for a Mixed-Type Equation in a Domain with Deviation from the Characteristic – A. S. Berdyshev	1847	2117
A Uniqueness Theorem for the Sturm-Liouville Operator on an Interval with Potential Having a Nonintegrable Singularity – L. A. Zhornitskaya and V. S. Serov	1855	2125

	Engl.	Russ.
Green's Function of a Two-Dimensional Problem for the Nonstationary VTS-Equation – Yu. V. Zasorin	1865	2135
A Boundary Value Problem Modeling a Transonic Flow in a Channel with Porous Walls – N. A. Lar'kin	1872	2143
Nonsimultaneous Resonances in Porous Media – A. M. Maksimov and E. V. Radkevich	1878	2149
The Solvability of a Nonclassical Boundary Value Problem with Second Boundary Condition in the Class of Even Functions – E. I. Moiseev	1888	2160
On the Analyticity of Periodic Solutions to Differential Equations with Singular Points. I – V. I. Prokhorenko	1896	2168
Many-Valued Solutions to Monge-Ampère Hyperbolic Equations – D. V. Tunitskii	1905	2178
SHORT PRELIMINARIES		
Two-Sided Estimates of the Eigenvalues of the Dirac Equation and Its Analogs – O. Ya. Savchenko	1917	2190
On the Behaviour of Trajectories of a Matrix Riccati Differential Equation – A. V. Savkin	1920	2193
